Fepixnebart– Anti-TGF α /epiregulin Bispecific Antibody

Fepixnebart (LY3016859) is a humanized monoclonal hIgG4 antibody, which binds and neutralizes only TGF α and epiregulin with high affinity. Fepixnebart can be used for the study of diabetic nephropathy and broad-spectrum chronic pain, including diabetic peripheral neuropathic pain (DPNP), signs and symptoms of osteoarthritis (OA), and chronic low back pain (CLBP).

Product Details	
Species Reactivity	Human
Source	Mammalian Cells
Isotype	Human IgG4 kappa
Class	Anti-Human Bispecific antibodies
Type	Recombinant Humanized
Clone	SP34-2/OKT3
Target	Anti-human TGF α /epiregulin
Purity	>96%
Molecular Weight	145.44 kDa
CAS Number	2489584-93-0
Formulation	NA
Storage conditions	Store at -80°C for 2 years. Aliquots should be stored at the same temperature after first use to avoid multiple freeze-thaws.
