

BP-50633

Solitomab– AntiEpCAM/CD3 Bispecific Antibody

Solitomab is an investigational bispecific T-cell engager (BiTE) antibody designed to treat various solid tumors by simultaneously targeting the CD3 receptor on T-cells and the EpCAM protein on cancer cells. By cross-linking the patient's own T-cells with the tumor cells, solitomab directs the immune system to actively locate and destroy cancer cells.

Product Details	
Species Reactivity	Human
Source	Mammalian Cells
Isotype	(scFv-kappa-heavy)-(scFv-heavy-kappa)
Class	Anti-Human Bispecific antibodies
Type	Recombinant Humanized
Clone	SP34-2/OKT3
Target	Anti-human CD3 /EpCAM
Purity	>98%
Molecular Weight	53.94 kDa
CAS Number	1005198-65-1
Formulation	NA
Storage conditions	Store at -80°C for 2 years. Aliquots should be stored at the same temperature after first use to avoid multiple freeze-thaws.
