Anbenitamab – Anti-HER2 Bispecific Antibody

Anbenitamab (KN-026) is a bispecific antibody simultaneously targeting extracellular domains II and IV of human HER2. Anbenitamab blocks both ligand-dependent and ligand-independent HER2 signaling pathways. Anbenitamab mediates antibody-dependent cellular cytotoxicity (ADCC) via FcγIIIa binding. Ambrinitumab can be used in research for lung cancer, HER2-positive metastatic breast cancer (MBC), gastric cancer, and gastroesophageal junction cancer.

Product Details	
Species Reactivity	Human
Source	Mammalian Cells
Isotype	Human IgG1 kappa
Class	Anti-Human Bispecific antibodies
Type	Recombinant Humanized
Clone	SP34-2/OKT3
Target	Anti-human HER2
Purity	>99%
Molecular Weight	145.16 kDa
CAS Number	2367012-88-0
Formulation	NA
Storage conditions	Store at -80°C for 2 years. Aliquots should be stored at the same temperature after first use to avoid multiple freeze-thaws.
