Vibecotamab - anti-human CD123 and CD3 Bispecific Antibody

Vibecotamab (XmAb14045) is a potent bispecific antibody targeting both CD123 and CD3. Vibecotamab targets T cell-mediated killing of CD123-expressing cells, regardless of T cell antigen specificity. Vibecotamab is a full-length immunoglobulin molecule. Vibecotamab can be studied in research for diseases such as Myelodysplastic syndrome and acute myeloid leukemia. Recommend Isotype Control: half-IG G1-kappa/(scFv-heavy-lambda)-h-CH2-CH3.

Product Details	
Species Reactivity	Human
Source	Mammalian Cells
Isotype	Human IgG1 kappa
Class	Anti-Human Bispecific antibodies
Type	Recombinant Humanized
Clone	SP34-2/OKT3
Target	Anti-human CD123 and CD3
Purity	>99%
Molecular Weight	126.15 kDa
CAS Number	2138442-13-2
Formulation	NA
Storage conditions	Store at -80°C for 2 years. Aliquots should be stored at the same temperature after first use to avoid multiple freeze-thaws.
