Fazpilodemab - Anti-Human FGFR1c and Klothoβ Bispecific Antibody

Fazpilodemab (BFKB8488A) is a humanized bispecific IgG1 antibody that selectively targets and activates fibroblast growth factor receptor 1c (FGFR1c) and Klothoβ. Fazpilodemab can be used for the research of type 2 diabetes mellitus (T2DM) or nonalcoholic fatty liver disease (NAFLD).

Product Details	
Species Reactivity	Human
Source	Mammalian Cells
Isotype	Human IgG1 kappa
Class	Anti-Human Bispecific antibodies
Type	Recombinant Humanized
Clone	SP34-2/OKT3
Target	Anti-Human FGFR1c and Klothoβ
Purity	>99%
Molecular Weight	144.48 kDa
CAS Number	2517935-02-1
Formulation	NA
Storage conditions	Store at -80°C for 2 years. Aliquots should be stored at the same temperature after first use to avoid multiple freeze-thaws.
